Centurion 3/3

10-30kVA

True Online Double Conversion UPS

Centurion 3/3 UPS series provides powerful and overall protection to your sensitive devices accepting a wide input voltage range for harsh environments. It is the perfect solution for powering a wide range of devices such as servers, data centers, industrial processes, telecommunication and security systems.

This small footprint, high power density, double-conversion online UPS has an output power factor of 0.9. It features complete dual mains inputs ranging from 10kVA to 30kVA. It also includes Digital Signal Processing (DSP) technology and active input power factor correction design. This ensures a stable, superior output power quality.

Features

High Availability

- Accepts dual-mains inputs
- Generator compatible
- Optional N+X parallel redundancy

Protection

- True online double-conversion
- Sophisticated 3-stage extendable charging design for optimized battery performance
- Emergency power off function (EPO)

Efficiency

- DSP technology guarantees high performance
- Output power factor 0.9
- Active power factor correction on all phases
- ECO mode operation for energy saving (ECO)

Versatility

- Adjustable battery numbers
- 50Hz/60Hz frequency converter mode
- Adjustable output voltages
- Includes Intelligent Slot, USB and RS232 connections

LCD Display

The Centurion 3/3 has an informative LCD Display with programmable features

Battery Bank Extension Options

- The Centurion 3/3 UPS provides the option to increase battery backup time by simply adding additional battery banks.
- To address the need for fast charging of multiple battery banks, PowerShield engineers have encorporated additional independent internal chargers into the PSCEBB40 and PSCEBB60CH.

Options

- PSSNMPV4 SNMP card (option to connect a PSEMD)
- PSEMD Environental Monitoring Device for temperature and humidity
- PSModbus Modbus card
- PSAS400 AS400 dry contact card
- Battery Banks Backup time for all models is easily extended by simply plugging additional battery banks PSCEBB40, PSCEBB60CH
- External Maintenance Bypass Switches -PS3-1MBSWPB10k or PS3-1MBSCPB10k, PS3-1MBSWPB20k or PS3-1MBSCPB20k, PS3-1MBSWPB30k or PS3-1MBSCPB30k

When using internal batteries from 16, 18 and 19, the unit will be de-rated according to the formula: P = rating X N/20. De-rating capacity to 90% when the output voltage is adjusted to 208VAC. Specifications are subject to change without prior notice. Models ending in "L" are long run models with larger chargers and therefore have no internal batteries. *CH represents Charger.

Extended battery options available for 10k and 20k models
