

VERTICAL RACKS

The PowerShield Vertical Rack is a perfect solution when space is limited. This lockable, freestanding or wall mounted solution has a footprint that is less than half of a conventional 19 inch equipment rack. There are four models in configurations of 4RU to 8RU wide, allowing for additional servers and switches to accompany a PowerShield rack mountable UPS.

FEATURES

SPACE SAVING

PowerShield Vertical Racks are wall mountable allowing both vertical and horizontal M6 mounting. At 450mm wide they take up less than half the floor space of most 19" cabinets.

STRONG CONSTRUCTION

Made from SPCC Quality rolled easy clean steel the vertical racks can hold up to 100kg and are compatible with 19" International Standard and Metrical and ETSI standards. The steel surface is finished with acid pickling to prevent rust and parkerizing to guard against corrosion.

EASY INSTALLATION

Shipped complete with no assembly required featuring cable entry knockouts at top, bottom and rear.

INCLUDES

Rails are included with locks and extra set of keys.

OPTIONAL

Optional dual fan kit is available to be fitted at bottom of the cabinet.

2-YEAR WARRANTY

2-year warranty on vertical cabinets.
